

HC-1230, -1240 and -1250 Series Hygrostats

Introduction

The HC-1230 series room hygrometers and the HC-1240 and HC-1250 series duct hygrometers are designed to control humidifying and dehumidifying equipment.

The HC-1230 and HC-1240 provide one SPDT contact.

The HC-1250 provides two SPDT contacts.

Hygrostats**

Features and Benefits	
<input type="checkbox"/> Room or duct enclosures, wide set point range.	Flexible application.
<input type="checkbox"/> SPDT contact.	Used for humidification or dehumidification and provides alarm signal.
<input type="checkbox"/> Model with two SPDT contacts available.	Available for two switching ranges with neutral zone.

Enclosure and contact

- 3 Room, 1 SPDT contact
- 4 Duct, 1 SPDT contact
- 5 Duct, 2 SPDT contacts

Note: A fixing bracket for the duct hygrometers is included in delivery.

Accessories

EQ-1240-7001	Kit for IP55 duct enclosure
EQ-1230-7001	Wall bracket

Installation and wiring instructions

To install please follow the instructions below:

- Locate the hygrometers where they will be exposed to normal ambient conditions.
- Avoid untypical draughts.
- Avoid exposure to direct heat or light radiation (sun, lamps or radiators), as this will cause incorrect readings.
- Avoid installing the hygrometers close to the humidification device, this could lead to condensation affecting the hygrometer.

Please note the installation orientation as illustrated below.

WARNING

Shock Hazard

Disconnect the power supply before wiring connections are made to prevent personal injury, shock or damage to equipment.

Equipment Damage Hazard

Make and check all wiring connections before applying power to the system. Short circuited or improperly connected wires may result in permanent damage to the unit.
